

# TENSOPOL

## Sodium Lauryl Sulphate

Sodium Lauryl Sulphate (SLS) is one of the primary surfactants widely used in oral care, personal care, home care as well as industrial & institutional applications.

SLS exhibits low irritation potential in mixed surfactant systems. Studies suggest acute irritation potential is reduced by >50% of its single component.

TENSOPOL SLS is produced with 100% renewable carbon, it has a natural origin index of 0.9 in accordance with ISO 16128. It is biodegradable & does not bio-accumulate in water or land.
